Stay & Play with Ultimate Escapes

For a true golf aficionado who wants to play golf at leading courses across the world, a single vacation home can be somewhat limiting. However, Luxury Destination Club's Ultimate Escapes offers an appealing alternative. For less than the down payment on a single multi-million dollar vacation home, members have virtually unlimited access to 135 luxury residences in many of the world's top golf destinations. Whether through access to exclusive private courses, or great proximity to unique and beautiful public courses, golfers will love the opportunity to play a different course on each and every vacation.

An increasingly popular trend in vacationing, destination clubs combine the comfort and space of a private vacation residence with the service and amenities of a fine hotel, allowing members the opportunity to travel to a variety of exciting destinations and always feel at home.

Ultimate Escapes, the market leader and industry's first publicly-traded club, features homes with access to popular courses such as Kiawah's Ocean Course, Scottsdale's Troon North Pinnacle Course and The Boulders South Course, Maui's Kapalua Resort Plantation Course, and many more. The Club also has properties in top ski destinations, beach destinations and city-centers across the world. In all, members have access to 150 domestic and international destinations.

So how does this all work? Much like a country club, members pay an initial fee as well as annual dues, which gives them access to every property within the Club's collection. Each member is assigned an Escapes Planner who takes care of every advanced detail, from reserving the home and suggesting itineraries, to booking tee times, private chef services, special excursions, spa appointments and more. At each destination, a local host prepares the home to the member's specifications, stocks the refrigerator and wine cellar, provides necessities for children such as cribs or highchairs, offers insider tips about the destination and handles any last minute requests. These highly personalized services allow members to avoid the tedium of vacation planning, and instead thoroughly enjoy their vacation – whether they're working on lowering their handicap or just enjoying the time off.
