AIRWALK ENIGMA Published: Feb 4th, 2011

After dropping as a **Japan exclusive last year**, the Airwalk Enigma is set to roll again in the West, with a limited run set to hit the Airwalk website. Packed with a custom footbed, the release kicks off Airwalk's 25th anniversary celebrations, with nine more iconic footwear releases lined up over 2011. Back in 1991 the Enigma changed the game with its chunky yet lightweight design - a major shift away from the run of the mill vulcs that had dominated the scene up till then. Available for \$75, pick up a pair of these tanned terrors [here](#).
